Art Unit: 2155

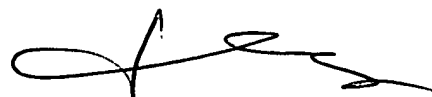

Claims 2-3 and 25-29 have been cancelled. The active claims are 1, 4-24 and 30.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 4-24 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nielson (USP 6,405,243) in view of Reilly (USP 6,427,164).

Details of the rejection have already been set forth in the last Office action. The details are incorporated herein by reference thereto.

All the independent claims have been amended to read that the sending information is entered **at** the sending device. The claims further clarify that the sending information (recipient's address) is for identifying a destination to which information to be sent by the sending device. Applicants argued for patentability that the "recipient's old email address" is not inputted by a user at the sending device. The Examiner disagrees. See at least the abstract and Figure 4 and 5 and the corresponding description in lines 60 of column 5 to line 54 of column 7 of the Nielson reference. The message to be sent to a recipient is received (step 401 of figure 4) **at** the sending device. The recipient's address is sent to the server for update if the message is not deliverable. This is exactly what is claimed in Applicants' claims.
